High-Performance Certified Ergonomic

- Integrated electrostatic dissipation in accordance with DIN EN 61340-5-1 with an electrical conductivity of $10^4 - 10^9$ ohms
- Use of conductive materials such as PUR integral foam, leatherette or fabric, as well as conductive castors, glides or disc bases
- Individually adjustable to the respective needs of the workplace and user
- Ergonomic seating concept to support a healthy posture

Our promise

Our Werksitz chairs are designed for long-term use. Every design, mechanism, and material is engineered to function reliably for years to come. This not only creates a durable product, but also promotes the sustainable use of resources.

ESD accessories

All ESD chairs are also available with step-up rails, foot rings and footrests.

Customized: Tailored solutions for ESD areas.

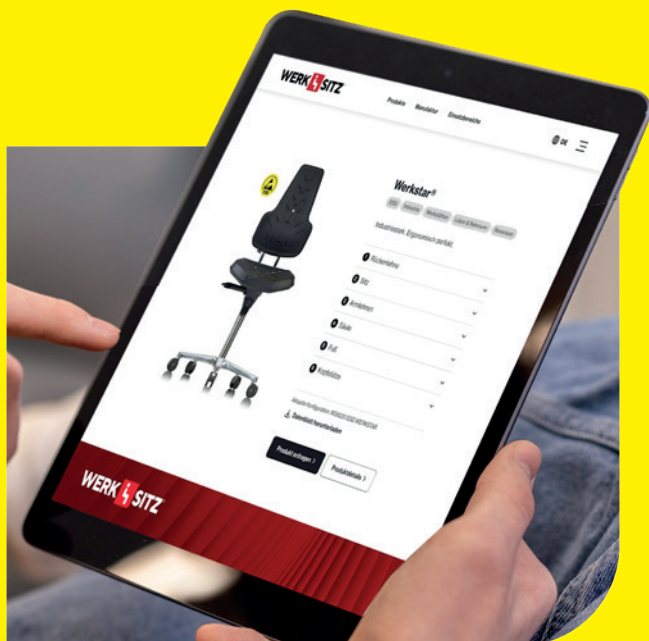

Create your own solution

Whether it's the color or armrests, step-up rails or glides, castors, bases, or surfaces – all components can be customized using our online configurator.

The result: work chairs that perfectly suit your specific needs – functional, ergonomic and perfectly matched to your workspace.
